I am a computer science student at the University of Abomey-Calavi, specializing in artificial intelligence. My work focuses on web development, data, and practical AI applications.

What I do

I build web applications and explore artificial intelligence methods. I document what I learn and the work I produce along the way.

Education

- **Since September 2023**: computer science, specializing in artificial intelligence, University of Abomey-Calavi.
- **2022–2023**: science studies, Mariama College, Niamey.

Interests

Artificial intelligence, software engineering, data, and applied research.

Experience

- **Since May 2026**: artificial intelligence internship, WAOUH MONDE, Cotonou.
- **June–July 2025**: web development internship, HOMINTEC Engineering Services, Cotonou.

Skills

Programming and data · Web development · Artificial intelligence and machine learning · Technical documentation and collaboration.
